The adjustment amount per kilowatt hour will be calculated to recover fuel cost adjustment amounts charged to the City by the Pacific Gas and Electric Co. for bulk power. (The fuel cost adjustment amount is not subject to any adjustment for voltage or power factor.)

SPECIAL CONDITIONS:

(a) Maximum Demand: The maximum demand in any month will be the maximum average power taken during any 15-minute interval in the month, but not less than the diversified resistance welder load. However, when the recorded monthly maximum demand has exceeded 400 kw for three consecutive months and thereafter until it has fallen below 300 kw for twelve consecutive months, a 30-minute interval may be used. In cases where the use of energy is intermittent or subject to violent fluctuations, a 5-minute interval may be used. A thermal type of demand meter which does not reset after a definite time interval may be used.

(b) Billing Demand: The billing demand to be used in computing charges will be the mean of the actual maximum demand as determined under Special Condition (a) above for the current month and the highest such demand occurring in the year ending with the current month.

(c) Off-peak Demand: Any customer whose billing demand has exceeded 400 kw for three consecutive months and thereafter until it has fallen below 300 kw for twelve consecutive months may, upon request, for billing purposes, and under a contract for service for a period of five years, have demands ignored which occur between 10:30 p.m. and 6:30 a.m. of the following day and on Sundays and the following holidays: New Year's Day, Washington's Birthday, Memorial Day, Independence Day, Labor Day, Veterans' Day, Thanksgiving Day and Christmas Day, as said days are specified in Public Law 90-363 (U.S.C.A. Section 6103).

(d) Voltage: Service on this schedule will be supplied at the transmission or the primary distribution voltage available or, at the option of the customer, at the secondary voltage available. Where secondary voltage is desired and polyphase power is to be combined with single phase, a four-wire service will be supplied.

(e) Voltage Discount: (1) When delivery hereunder is made at the same primary distribution voltage as that of the line from which the service is supplied, or (2) when sufficient capacity is not available in distribution facilities existing in the area to supply the customer's requirements, and the city has elected to supply service from a transmission line due to operating necessity, a discount will be allowed on the above charges, including the minimum charge. Rate I discount will be 4% of the demand and energy charge. Rate II discount will be 15C per kw of billing demand in the month. The City retains the right to change its line voltage at any time, after reasonable advance notice to any customer receiving a discount hereunder and affected by such change, and such customer then has the option to change his system so as to receive service at the new line voltage or to accept service (without voltage discount) through transformers to be supplied by the City.

(f) Power Factor: When the billing demand has exceeded 400 kw for three consecutive months and thereafter until it has fallen below 300 kw for twelve consecutive months, bills will be adjusted for weighted monthly average power factor as follows:

The total charge (except the minimum charge) for any month

as computed on the above rates will be decreased or increased, respectively, by 0.1% for each 1% that the average power factor of customer's load in the month was greater or less than 85% such average power factor to be computed (to the nearest whole per cent) from the ratio of lagging kilovolt ampere hours to kilowatt hours consumed in the month.

Section 9. EFFECTIVE DATE - The Ordinance is being published one time in the "Lodi News-Sentinel", a daily newspaper of general circulation printed and published in the City of Lodi and shall be in force and take effect with services rendered on or after September 1, 1980.
